

## *An important update regarding international travel*

*Update: 06/04/2020*

Issued: June 4, 2020

Many foreign governments are restricting entry into their respective countries due to the coronavirus (COVID-19). If you have customers traveling to a country that currently has restrictions in place, entry may be denied.

You can find more information about each travel restriction (by country) from the [International Air Transport Association \(IATA\)](#). Their website provides the most current and accurate information regarding international travel.

American's policy for supplying passport information has been at time of check-in, however, because of the foreign traveler restrictions in place, we are requesting passport information be added to all international reservations a minimum of 72 hours prior to departure.

Thank you for improving your customers' travel experience by providing this detail for international travel. We value your business and appreciate your assistance.
