Introducing Distribution Cost Recovery (DCR)

As part of Air Canada's overall effort to modernize product distribution, the previously communicated Distribution Cost Recovery (DCR) will also go into effect on June 14, 2023 at EST 00:00am to address the cost of legacy distribution models. This DCR will be applicable to all tickets issued globally via GDS EDIFACT channels effective June 14, 2023. The DCR will be USD21.5 per ticket on each PNR for most GDS tickets (or USD24.0 for Sabre), applicable on 014 issued tickets that include AC operated flights, or AC marketed flights operated by other airlines.

DCR can be identified using the YR code in the fare calculation box.

The DCR does not apply to bookings made via any of Air Canada's NDC connection options including NDC-sourced content in a GDS solution, as well as through Air Canada's other direct booking channels such as aircanada.com, aircanada.com/agents, Air Canada for Business, and the Air Canada mobile app, or groups ticket.
