Distribution Cost Recovery (DCR) for PoS HKG

Please be informed that effective immediately, Distribution Cost Recovery (DCR) will not be applicable for Air Canada tickets issued in Hong Kong Point of Sales (POS) for international travel from Point of Origin (PoO) Hong Kong via GDS EDIFACT channels. For all other itineraries where point of origin (POO) is NOT Hong Kong, DCR continues to be applicable in Hong Kong Point of Sales (POS).

The DCR will be USD21.5 per ticket on each PNR for most GDS tickets (or USD24.0 for Sabre), applicable on 014 issued tickets that include AC operated flights, or AC marketed flights operated by other airlines.

DCR can be identified using the YR code in the fare calculation box.

The DCR does not apply to bookings made via any of Air Canada's NDC connection options including NDC-sourced content in a GDS solution, as well as through Air Canada's other direct booking channels such as aircanada.com, aircanada.com/agents, Air Canada for Business, and the Air Canada mobile app, or groups ticket.
